RE: Amendment to Biochemical Oxygen Demand (BOD) in Permit Renewal Application of Surface Water Quality Permit No. 0044741 for Williamsburg Receiving and Storage, 10190 Munro Road, Whitewater Township, Williamsburg, Michigan

Dear Mr. Fisher:

As we discussed on the telephone today, this letter requests that Biochemical Oxygen Demand numbers be amended to 287 kilograms/day (58 milligrams/liter). The original application requested 600 milligrams/liter, which was an erroneous number. The levels requested with this submittal are the levels originally permitted for at the Williamsburg Receiving and Storage facility.

Please call me at (231)941-2025, extension 104, if you have any questions regarding this amendment.

Sincerely,

ENVIRONMENTAL SOLUTIONS, INC.
